DETAILED ACTION

Entry of Amendment

1. Applicant's amendment, filed on August 20, 2003 as paper No. 12, is acknowledged. Claims 33-49 are currently pending.
2. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

-Claims 33-49 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

In claim 33, the inventors claim an ultrasound emitter comprising apertures that produce a reduced grating-lobe ultrasound beam, and that the energy emitted from at least two of the first, second, and third apertures are produced in response to separated excitation signals. However, the specification fails to describe any aperture, nor does it mention the use of separate excitation signals to. Furthermore, claim 45, besides the above, further claims having a first and second aperture disposed in an array such that centers of the apertures are

displaced from each other by at least two different distances. However, at no point does the specification mentions any aperture with its center displaced from each other at different distances.

Response to Arguments

4. Applicant's arguments with respect to claims 33-49 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeoyuh Lin whose telephone number is (703) 306-5990. The examiner can normally be reached on m-f, 8:30-6:00.
